

Canada's leading full-service OOH advertising company, with more than 12,000 static and digital displays in over 60 markets across Canada, including the 10 largest markets in the country.

We are currently seeking an enthusiastic and driven team player to join our Digital Transformation team in Toronto as an *Database Administrator (DBA)*

In this role, YOU will be responsible for

1. Build high availability/high quality database systems based on each end user's specialized role and business requirements
2. Work on both on-premise and cloud solutions (AWZ, Azure, Mongo DB, Cosmos DB)
3. Setup database instances for replicating data from vendor instances to real time on various Cloud platforms. Verify database structure, create tables and views as per development requirements
4. Minimize database downtime and manage parameters/indexes to provide fast query responses. Use high-speed transaction recovery techniques and data backup
5. Create and implement a data migration strategy for traditional systems like DB2 to Cloud platforms
6. Provide proactive and reactive data management support and training to users
7. Perform tests and evaluations regularly to ensure data security, privacy and integrity. Monitor database performance, implement changes and apply new patches and versions when required
8. Assist with schema design, code review, and SQL query tuning
9. Determine, enforce and document database policies, procedures and standards. Maintain current on related knowledge and technical skills. Collate, prepare and present statistical information for internal and external use
10. Maintain Health & Safety Regulations and perform other related duties as assigned

YOU possess

- Post secondary education in Bachelors of Engineering with a focus and strong understanding of Computer Information Systems or a related field or an equivalent combination of education, training and experience
- 5+ years of hands-on experience with database standards and end user applications. Proven working experience as a Database Administrator with an excellent knowledge of database design, data backup, recovery, security, integrity and SQL
- Experience in delivering solution built on Cloud Computing platforms with familiarity in IaaS, PaaS, SaaS, FaaS and an understanding of Programming Languages and APIs. Energetic, self-motivated and results-oriented and a proven team player who is both flexible and adaptable
- Computer proficient, including effective working skills of MS Word, Excel, PowerPoint, MS Visio, JIRA, Confluence, and Slack
- Effective planning, prioritization, organization, multi-tasking and time management skills to meet deadlines and changing priorities to ensure that MVP and Project timelines are met
- Ability to recognize and respect traditional organizational culture with the intent to help business user's change and adapt to newer technologies and processes.
- Good communication, both oral & written. Good interpersonal skills and the ability to build healthy working relationships
