

Superboards - Space Extensions

Production Specifications

SPACE EXTENSIONS FOR SUPERBOARDS

Space extensions are used to extend specific elements of the creative. Multiple extensions are possible (for example: a top & side extension), provided the total extension area does not exceed the maximum allowable square footage in the respective market.

Space extensions are intended to enhance the advertiser's creative, not increase the size of the structure. Extending the overall width or height of the structure is not permitted. For example: an extension that is 2'H x 48'W on a Series-14 is not permitted.
